

VT Nightsight

The next generation in camera technology

VT Nightsight

Our **VT Nightsight** camera uses advanced technology to introduce one of the best performing night vision cameras to the commercial vehicle market.

Specifically developed for demanding environments, this new advancement offers unbeatable day time HD clarity with the addition of unprecedented night vision capabilities that allows the camera to capture clear, high resolution, coloured images in areas where there is little or absolutely no light.

FEATURES:

- **24 Hour Perfect Vision**

State of the art lens performance and advanced sensor to guarantee exceptional night vision with HD resolution, even in extreme low light conditions.

- **Vast Range of Cameras**

Available across all camera scenarios. Forward facing, rear and side positioning, providing optimum vision across all applications.

- **Coloured Images Day and Night**

Advanced technology giving drivers and operators not only a clear colour view, but also allows them to see further into the distance for a greater understanding of their surroundings.

- **Unbeatable Safety**

Optimum performance combined with technological advancement to enhance the safety of your fleet.
