

VT SafeZone

Ensuring the safety of pedestrians around vehicles and heavy machinery is our top priority.

VT SafeZone

The **VT SafeZone** system is designed to establish secure zones where pedestrians and machinery operate, and, most importantly, save lives.

By emitting a clear light barrier it establishes a safety zone around the perimeter of a vehicle or heavy equipment. The VTSafeZone system effectively alerts pedestrians to potential danger zones, helping them stay safely away from moving vehicles and equipment.

FEATURES :

- **Reduces Incidents:** Powerful red beam that will grab pedestrians' attention
- **LED Beam:** Red LED beam which defines the danger zone
- **Robust:** Polycarbonate lens, rugged heatsink housing and stainless steel mounting bracket
