

VT Ident Plus

Vehicle Security / Anti-rollaway system

VT Ident Plus

The intelligent driver and vehicle authorisation system prevents theft, accidents and unauthorised vehicle use by ensuring only trained and authorised operators can start and operate vehicles and/or equipment, with built in anti-rollaway protection.

FEATURES:

- Complete controlled driver and vehicle access.
- Prevents accidents and offers anti-rollaway protection with park brake monitoring. Park brake not applied events are logged with failsafe activation.
- Advanced driver authentication with multiple methods supported including passive RFID tags, RFID cards, keypads, pin codes and tachograph driver cards.
- The flexible authentication options are designed to suit site, fleet, or customer requirements and the technology means no batteries, no maintenance and no limited lifespan.
- Integrated telematics, tracking and reporting via VT Connect. This offers live vehicle tracking, driver activity and behaviour logging and reporting, full visibility of driver usage, access attempts and events.
- Improves operational efficiency and fleet utilisation.
- Reduces fuel consumption by preventing unnecessary engine idling and minimises vehicle misuse, damage and downtime.
- Designed for harsh industrial and fleet environments.
- Up to 60 month warranty available.
